

AGENT RECOVERY CONTROL PLANE

Revive.

**AI agents are starting to act:
sending, buying, paying.**

When one fails, Revive picks it back up **without doing it twice.**

PRE-SEED `pip install revive-sdk` certified in production

A real recovery record.

Live at revivelabs.app

WHY NOW

Software just started acting for us.

02

TALK

2023 TO 2024

Chatbots and copilots.

A wrong answer is annoying.

ACT

2026

Agents send, buy, pay.

A wrong action is real damage.

SCALE

NEXT

Millions acting daily.

Failure becomes a daily event.

Payments got Stripe. Outages got PagerDuty. **Agents acting in the real world get Revive.**

THE PROBLEM

It's 3am. Your agent just charged the customer **twice.**

03

```
03:07:41 agent/invoice-runner step 4 of 7
```

```
03:07:41 POST /v1/charges $49.00 ..... ok
```

```
03:07:44 credential expired mid-run
```

```
03:07:52 retry #1 POST /v1/charges $49.00 .. ok
```

```
03:07:52 DUPLICATE CHARGE. customer billed twice.
```

IF YOU RETRY

it sends twice

IF YOU SKIP

the job breaks

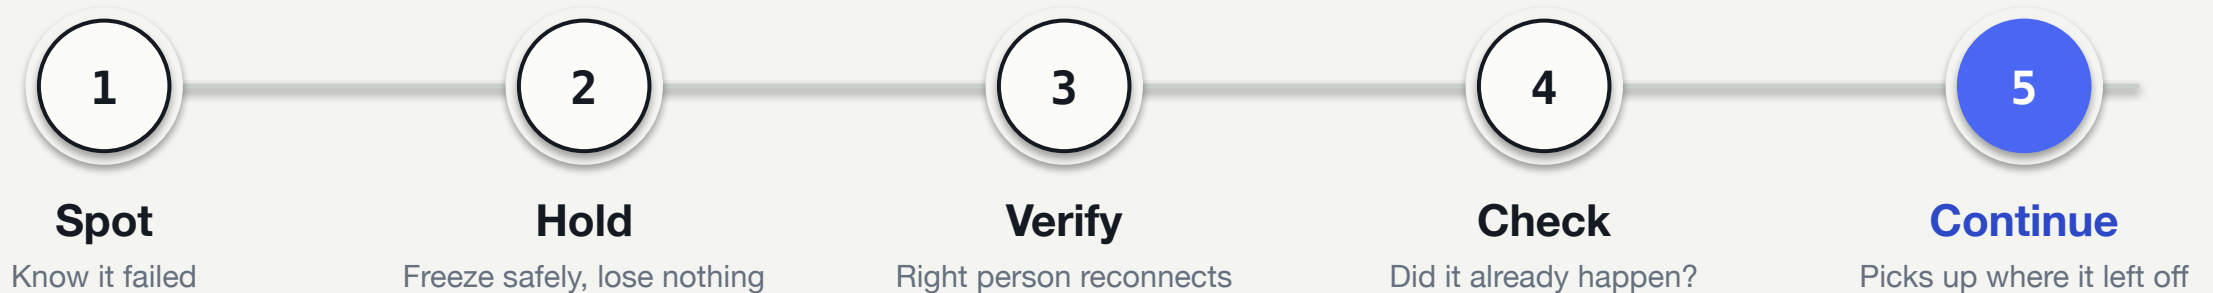

IF YOU RECONNECT BLIND

wrong person acts

THE SOLUTION

A safety net under every action.

04

ONE LINE OF CODE **Revive owns everything after the failure.**

This is what a save looks like.

Resumed

✓

Charge already went through. Revive did **not** run it again.

WHY ONLY US

Anyone can retry. Only we know if it already happened.

We ask the source

We check the real system before anything runs again.

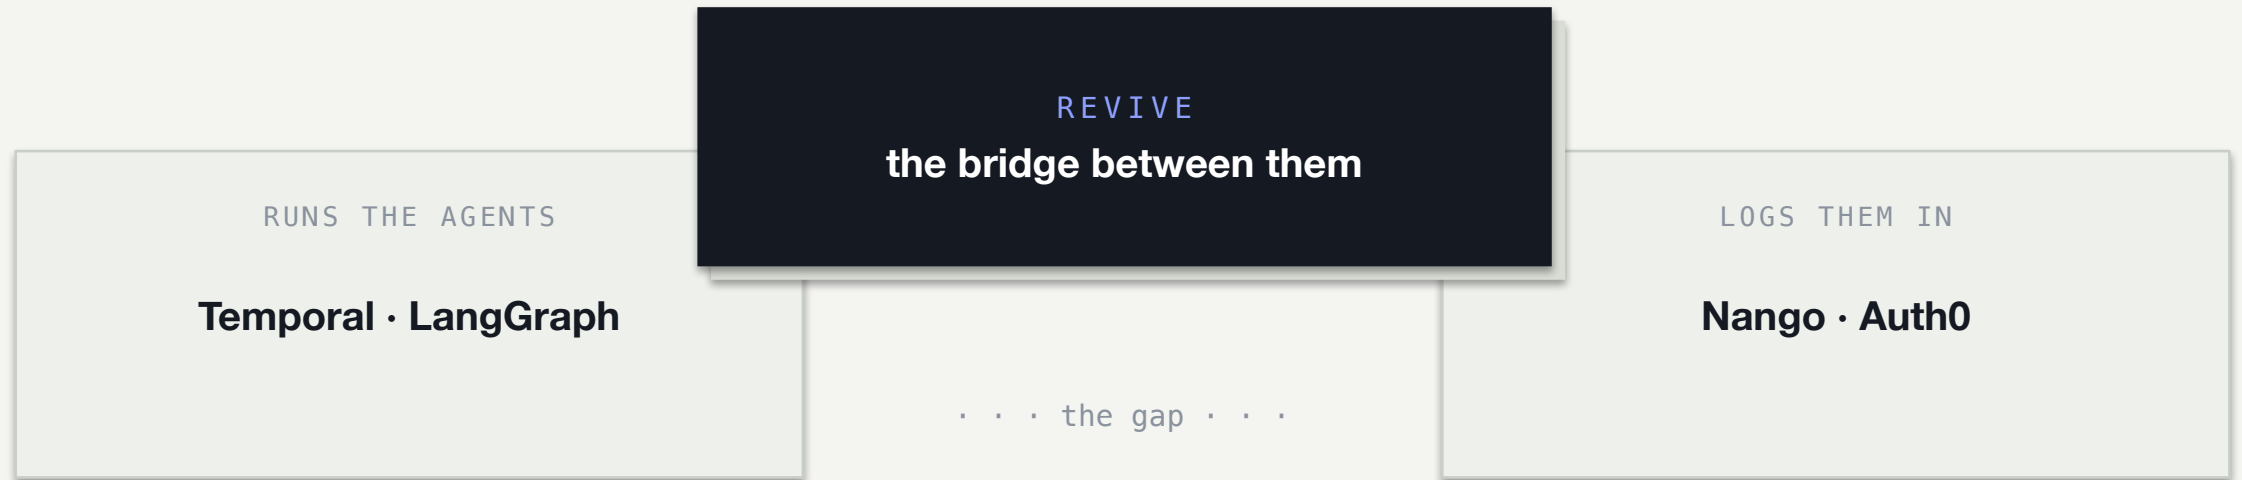

The right human

Same person proven back before the agent gets new keys.

We never hold keys

Logins stay in your vault. We store nothing.

**Everyone owns one piece.
Nobody owns the recovery.**

These two sides don't talk to each other. Teams hand-roll half-fixes today. Revive is the real one.

Bottom-up, and it grows **tenfold** on its own.

\$5B+

Every team running production agents 2M teams by 2030 × ~\$2.5k/yr

\$100M → \$1B+

Agents touching email, money, CRM 50k teams today × ~\$2k/yr

\$5M ARR

Our 3-year capture 2.5k teams × ~\$2k/yr

Gartner puts agents in a third of enterprise software by 2028. **Every new acting agent lands in our SAM.**

We get paid every time we save one.

09

DEV

\$20 /mo

first workflow

TEAM

\$99 /mo

The landing plan.

25 connections · 10k saves a month

ENTERPRISE

Custom

where margin lives

More agents means more saves means a bigger plan. Upgrades happen on their own. Software margins.

Land where the builders already are.

10

01 Framework communities

devs hit this exact failure

02 Vault partnerships

a connection dies, we step in

03 Incident inbound

every agent mishap brings leads

UNIT ECONOMICS · TARGETS

5 : 1 LTV to CAC

CAC < \$500 community-led, not sales

LTV ~\$2.4k Team plan, 2-year retention

12-MONTH TARGET 40 paying teams and a first enterprise logo, about \$50k ARR. Pre-revenue today.

Three technical founders. All ship code.
